OLD MUTUAL NAMIBIA UNIT TRUSTS

Old Mutual Namibia Unit Trusts offer Investors expertly Managed Funds to suit a variety of Investment and savings needs. These Funds can be accessed via accredited financial advisors or through brokers.

What is a Unit Trust?

Unit Trusts use the combined money of investors to invest in global markets and economies. This combined investment is managed by investment professionals - called Portfolio Managers - who buy shares and other assets classes on behalf of their clients - according to the mandate of the Unit Trust. Unit Trusts offer an easy, convenient and affordable way to invest in shares - and other asset classes. There are many types of Unit Trust Funds that are designed to offer you - the investor - a range of different benefits depending on your particular needs. These can range from long-term growth - to Funds that give the investor a regular income.

An added benefit is that because Unit Trusts are made up of more than one investment, the Portfolio Manager can make a decision to buy assets that are performing well, and to sell under-performing assets in order to meet the objectives on the Unit Trust, and your own investment goals.

Old Mutual Namibia Unit Trusts offers a range of Unit Trust Funds with different risk profiles, from the very conservative to more aggressive Funds, in order that you can build a diversified investment portfolio tailored to meet your personal investment needs, your risk profile, and your long term investment goals.

There is no contractual term with a Unit Trust, and you may sell your investment at any time. However, it is recommended that you view your Unit Trust portfolio as a medium to long-term investment.

FEATURES & BENEFITS

- Unit Trusts offer you the flexibility to tailor an investment portfolio to suit your specific needs and time horizon.
- You can buy them directly from your financial adviser or broker.
- You can access the stock exchange without needing prior knowledge or experience in investing in equities.
- You gain the ability to diversify (spread) your investment across different markets, sectors, and economies - greatly reducing your overall investment risk.
- Money invested in Unit Trusts is easily accessible, especially when you most need it.
- Unit Trusts offer exciting capital growth opportunities, but should be viewed as a medium to long-term investment tool.

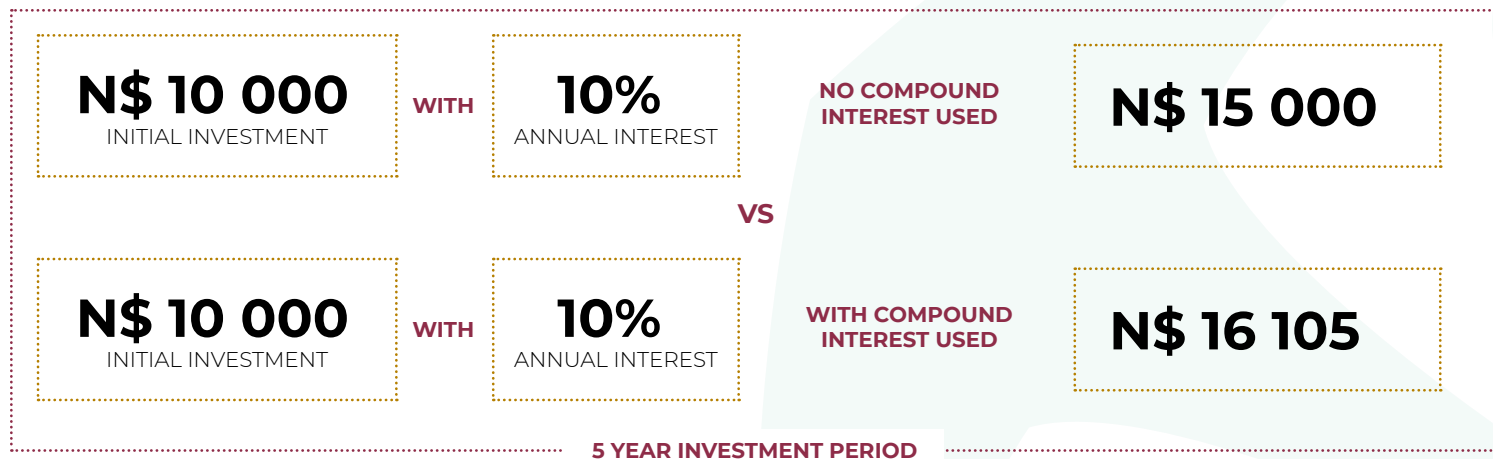

MAKE MONEY ON YOUR OWN MONEY

Did you know that when investing, your money is working for you through a simple concept called compounding growth?

Saving with compound interest

THIS YIELDS **N\$ 1 105** MORE WHEN COMPOUND INTEREST IS USED

But there's a catch

COMPOUND INTEREST IS ONLY AFFECTIVE OVER TIME

The longer you put off investing, the longer it will take to reach your goal and the more it will cost you.

INVESTING CONSISTENTLY IS CRUCIAL

Whilst few of us have the luxury of investing a lump sum, investing smaller amounts regularly over time can be just as effective to build wealth, without making too dramatic an impact on your budget.

INVESTMENTS ARE FLEXIBLE

A Unit Trust offers the flexibility to change your monthly investment as your circumstances change - without you incurring penalties. We also offer the option to have your debit order amount automatically increased each year, helping you combat the ravages of inflation.

DON'T FORGET THE RISKS

Unit Trust Funds come with an element of risk, based on a "risk profile" from 1 being low risk, to 5 being a more aggressive risk. Lower risk Funds are made up of more cash and bond elements, whereas higher risk Funds concentrate more on the equities market across many economies.

Compounding simply means making money on your original investment, as well as on the gains made in the following years (i.e. growth on growth over time). If you leave your investment over a long period of time, the investment not only grows each year, but grows exponentially. This interest is called compound interest, and is the key to long term growth and wealth.

ENHANCED INCOME FUND

WHAT IS THE FUND FOR?

The fund is suitable for investors needing a relatively high level of income together with some capital appreciation. These are investors who are able to live with volatility in income distribution levels. Income is paid in the form of quarterly distributions and can be supplemented with regular automatic withdrawals

WHAT ARE THE FUND'S OBJECTIVES

The fund aims to outperform money market investments and produce a relatively high level of income. It aims not to lose money over any 6-month period.

HOW IS THE FUND MADE UP?

This actively managed fund invests in a wide range of Namibian and South African interest-bearing assets (for example, money market instruments, bonds, listed property and preference shares). The fund manager moves actively between these assets, based on a relative value approach.

DOES IT DISTRIBUTE INCOME?

NO

Periodic income can be received on request.

OLD MUTUAL NAMIBIA

MANAGED FUND

WHAT IS THE FUND FOR?

The Old Mutual Namibia Managed Fund is suitable for investors who require long term growth, with less volatility in the short term than investing in pure equities. It is suitable as a stand-alone retirement investment.

WHAT ARE THE FUND'S OBJECTIVES

The Fund aims to achieve longterm inflation-beating growth. The Fund has a growth asset bias and will invest more heavily in shares.

HOW IS THE FUND MADE UP?

The Fund is exposed to all sectors of the Namibia and South African Market (shares, bonds and property). The Fund complies with the Namibian Retirement Fund Legislation.

DYNAMIC FLOOR FUND

WHAT IS THE FUND FOR?

This fund is suited to investors who strive for long-term capital growth as well as some level of capital protection

WHAT ARE THE FUND'S OBJECTIVES

The fund strives for long-term capital growth as well as some level of capital protection. Through the use of a quantitative risk model, the fund aims to profit from a rising share market and protect against capital losses in a weak market

HOW IS THE FUND MADE UP?

The fund invests across Namibian and South African shares, bonds and cash – moving from shares into fixed interest investments when the fund's value drops below a predetermined "floor". When markets start to move up, the fund increases its holdings in shares, tapping into these growth opportunities. Derivatives may also be tactically used to manage and limit downside risk and to capture or lock in gains as and when they occur. The fund conforms to retirement fund legislation.
